	INTERNATIONAL SEARCH REPORT	₹T	International application No.		
		,	PCT/US03/40988		
A. CLASSIFICATION OF SUBJECT MATTER IPC(7) : A01H 5/00; C12N 15/82 US CL : 800/281, 298; 435/419, 468 According to International Patent Classification (IPC) or to both national classification and IPC B. FIELDS SEARCHED					
Minimum documentation searched (classification system followed by classification symbols) U.S.: 800/281, 298; 435/419, 468					
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched					
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) SEQUENCE DATABASES, WEST, DIALOG					
	UMENTS CONSIDERED TO BE RELEVANT				
Category *	Citation of document, with indication, where a			Relevant to claim No.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/40988

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)				
This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2. Claim Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
Claim Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)				
This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet				
As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite				
As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-8				
Remark on Protest The additional search fees were accompanied by the applicant's protest.				
No protest accompanied the payment of additional search fees.				

Form PCT/ISA/210 (continuation of first sheet(1)) (July 1998)

	PCT/US03/40988				
INTERNATIONAL SEARCH REPORT					
BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.					
Group I, claim(s) 1-8, drawn to a transgenic plant transformed with DNA encoding SEQ ID NO: 2, and a method of producing a high oil phenotype in said plant.					
Group II, claim(s) 9-11, drawn to a method of generating a plant having a high oil phenotype by identifying a plant with an allele of citrate synthase that results in increased oil content.					
The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires an isolated DNA encoding the amino acid sequence of SEQ ID NO: 2, which is not required by Group II. In addition, the methods of Group I and II require different method steps and result in different products and are of different scope with regard to alleles of citrate lyase, wherein Group II is not limited to a plant having in it's genome DNA that encodes an amino acid sequence of SEQ ID NO: 2.
